### DETAILED ACTION

1. Receipt of Applicant's Amendment, filed 09/19/2005 is acknowledged.

#### *Reasons for Allowance*

3. Claims 1-8, 25-33, 35-43, 45 are allowed, now renumbered as 1-27.
4. The following is a statement of reasons for the indication of allowable subject matter:

The present invention is directed to an improved method and apparatus for creating a snapshot of a file system. A record of which blocks are being used by a snapshot is included in the snapshot itself, allowing effectively instantaneous snapshot creation and deletion.

Claims 1, 26, 36 identify the uniquely distinct feature of "generating a summary map by performing a logical OR operation with at least one said copy of said active map included in said consistency point".

The closest prior art, Sekido et al. (U.S. Patent No. 6,311,193), shows a substantially similar method for creating snapshots holding the contents at a specific point in time for each of the nonvolatile storage devices and stores the created snapshot into the corresponding nonvolatile storage device. The configuration makes it possible to create snapshots effectively without any modification to application programs or a file system. However, Sekido et al. fail to anticipate or render the above-cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
